

Join the

Louisiana Roundtable for the Environment

Lead Poisoning Prevention Project

Can we count on you, your Group or business to help end Lead Poisoning in New Orleans? Join our coalition.

- Children in New Orleans have Blood Lead Levels of more than 3 times those in Flint, Michigan.
- 99% of the drinking water tested by LSU has Lead.
- Mardi Gras beads, makeup, jewelry and toys all have Lead.
- Lead poisoning is not limited to children. Adults carry Lead in their bones.
- Long-term exposure to Lead Poisoning causes learning disabilities, aggressive behaviors, damage to every organ in the body, dementia and death.

The Louisiana Roundtable for the Environment is working on implementing policy around:

- LEAD in the Water
- Worker Safety
- Increased testing of all children for Lead
- Housing Rehabilitation
- Intervention Programs: Special Education in Schools, mental health, violence prevention, re-entry programs and nutrition.

If you are a concerned about

- Children
- the elderly
- mental health
- special education and school issues
- criminal justice
- toxins and environmental health
- safe housing

Join us and make your voice heard.
